Dear Hiring Team,

I'm excited to apply for the AI and ML Intern position at Smart Rewards Inc. I recently completed my Master's in Data Science from DePaul University, and I'm eager to start working hands-on in AI and machine learning. This internship is exactly the kind of opportunity I've been looking for—a chance to work on interesting projects, learn from experienced professionals, and make a meaningful impact through AI.

During my studies, I got the chance to work on a range of machine learning projects, including building a sentiment analysis model to classify news articles. This experience helped me sharpen my skills in data preprocessing, feature engineering, and using frameworks like TensorFlow, PyTorch, and Hugging Face. I'm also proficient in Python and comfortable working with tools like NumPy and pandas for data analysis.

I love the idea of being part of a team that's pushing the boundaries of AI. I'm particularly excited about the chance to work with large language models and help create innovative AI-driven solutions. I know this role will give me the perfect opportunity to grow, collaborate, and contribute to something impactful. I love Smart Rewards Inc's vision of motivating students and teachers by rewarding both academic and non-academic achievements. The focus on encouraging growth and participation creates such a positive and inclusive learning environment. It's inspiring to be part of a mission that helps bring out the best in everyone involved.

Thank you for considering my application. I'd love the chance to be part of Smart Rewards Inc. and would be thrilled to discuss how I can contribute to your team.

Best,
Maheen Adeeb
